Recommendations

Make these changes to improve the property's energy efficiency.

Recommended improvements are grouped by the estimated time it would take for the change to pay for itself. The assessor may also make additional recommendations.

Each recommendation is marked as low, medium or high. This shows the potential impact of the change on reducing the property's carbon emissions.

Changes that pay for themselves within 3 years

Recommendation	Potential impact
Consider introducing or improving loft insulation.	High
Consider introducing a system of regular checks of Heating, Ventilation and Air Conditioning (HVAC) time and temperature settings and provisions to prevent unauthorised adjustment.	Medium

Changes that pay for themselves within 3 to 7 years

Recommendation	Potential impact
Engage experts to propose specific measures to reduce hot water wastage and plan to carry this out.	Medium

Changes that pay for themselves in more than 7 years

Recommendation	Potential impact
Consider installing building mounted photovoltaic electricity generating panels.	High
Engage experts to review the building lighting strategies and propose alterations and/or upgrades to daylighting provisions, luminaires and their control systems and an implementation plan.	High
